C S R VEDVIKAS

Final-year B.Tech Electronics & Communication Engineering student seeking software engineering and core electronics roles.

+91 9606083540 csrved2504@gmail.com LinkedIn GitHub Bengaluru, India

EDUCATION

PES University | Bengaluru — 2023 – 2027
B.Tech, Electronics & Communication Engineering — *CGPA: 7.63*
Minor in Computer Science Engineering — *CGPA: 9.0*

Base PU College | Mysore — 2021 – 2023
Class XII (CBSE) — *Percentage: 81%*

St. Joseph's Central School | Mysore — 2020 – 2021
Class X (CBSE) — *Percentage: 92.2%*

WORK EXPERIENCE

AI/ML Research Intern — Jun 2026 – Jul 2026
ISFCR, PES University

- Designed a two-stage AI-assisted development pipeline using Claude for architecture and Cursor for implementation, shortening the path from specification to functional prototype.
- Built three browser-native ML teaching labs in vanilla JavaScript: an optimizer visualizer implementing SGD, Momentum, RMSProp, and Adam from scratch, a CNN that trains live on MNIST via TensorFlow.js, and an in-browser OCR pipeline.
- Verified the labs by extracting their algorithms into a headless Node test harness and re-running them across parameter sweeps, surfacing and fixing convergence-detection and rendering bugs.

Technologies / Skills Used : *Claude, Cursor, vanilla JavaScript, TensorFlow.js, Node*

PROJECTS

Cursor AI Playbook | Website
Developer

- Built a single-file, offline-first interactive learning platform that teaches the Cursor AI workflow alongside ML fundamentals.
- Implemented three hands-on labs from first principles — a gradient-descent and optimizer explorer, a live-training CNN on MNIST, and an in-browser OCR tool.

Technologies / Tools Used : *JavaScript, TensorFlow.js, Tesseract.js, HTML5 Canvas*

ForgeFit — Full-Stack Fitness PWA | GitHub
Developer

- Built a multi-user fitness app: a React (Vite) front end over a FastAPI and SQLite backend that handles login, workout logging, personal-record tracking, and daily food logs.
- Let users type their logs in plain language and used an LLM to parse that text.
- Made the front end handle the states that usually break apps through one API layer with timeouts, retries, and error messages.

Technologies / Tools Used : *Python, FastAPI, React, SQLite, Vite, LLM*

Chatbot Suite | GitHub
Developer

- Built a suite of ML-backed conversational apps (price prediction, medical risk screening).
- Trained classification and regression models on real-world datasets.

Technologies / Tools Used : *Python, scikit-learn, LLM Integration*

SKILLS

Programming Languages :	Python, C++, C, JavaScript, SQL
Frameworks & Libraries :	TensorFlow.js, React, FastAPI, scikit-learn
Databases :	MySQL, MongoDB
Core CS :	Data Structures & Algorithms, Operating Systems, DBMS, Problem Solving

CERTIFICATIONS

Google Cybersecurity | Certificate — Oct 2024
Google

- Identified common risks, threats, and vulnerabilities while applying mitigation techniques; protected networks, devices, and data using SIEM and IDS/IPS tools.
- Gained hands-on experience with Python, Linux, SQL, and Bash, focusing on threat detection, vulnerability management, and system hardening.

100 Days of Code: The Complete Python Pro Bootcamp — Oct 2023
Udemy

- Built games, GUIs, and desktop apps in Python using Selenium, Beautiful Soup, Requests, Flask, Pandas, NumPy, scikit-learn, and Matplotlib.
